# ProxSocket™ Installation

1. **Place** the **gasket under** the ProxSocket™ **Flange**

2. **Insert** the **ProxSocket™** into a 4041mm hole **in** the **interior wall** of the vessel

Note: Ensure the gasket is seated between the interior wall and the ProxSocket™ Flange.

PATENT PENDING

3. **Tighten** the **nut** to 5-10 in-lbs **onto** the body of the **ProxSocket™**

Note: The gasket should be compressed but not bulging.

PATENT PENDING

4. **Hand tighten** the **sensor** into **ProxSocket™** body until it reaches the inside face

Note: Secure the sensor with a jam nut or set screw, if necessary.
